TECHNICAL SKILLS

- **Programming languages:** JavaScript, HTML, CSS, Java, C, C++, C#, Kotlin, R, and Python.
 - **Database management:** SQL, MySQL, SQLite, MongoDB, Firebase, Firestore, and Oracle.
 - **Frameworks:** React, React Native, Node.js, Express, Tailwind, Bootstrap, and EJS.
 - **Tools:** Git, Figma, and various Adobe Creative Cloud products such as Photoshop, Illustrator, XD, and Premiere.
 - **Languages:** professional communication skills (spoken and written) in English and Korean; conversational level in Japanese.
-

WORK EXPERIENCE

Freelance Web Developer | Remote

July 2025

Skyblue

- Developed and optimized a comprehensive website for Skyblue, increasing user engagement through intuitive UI/UX design, coding all front-end elements using JavaScript, HTML, and CSS to enhance aesthetic appeal and functionality.
- Ensured high search engine visibility by executing SEO best practices, resulting in Google indexing of the website within two weeks and achieving top-three ranking positions for targeted keywords, thereby driving a natural increase in traffic.
- Established strong relationships with clients through clear communication, responsiveness, and delivering high-quality work on time and within budget.

Frontend Engineer | Remote

Sept 2024 – June 2025

Echo of the North

- Engineered and launched a translation application that successfully helped preserve the Kangiryuarmiutun dialect of Inuinnaqtun, a dying Indigenous language, resulting in over 2,000 community-submitted phrases and an increase in dialect documentation efforts.
 - Developed intuitive front-end interfaces for web and mobile platforms using React Native, HTML, CSS, JavaScript, EJS, and Figma, achieving a fully responsive design that enhanced user engagement across devices compared to previous tools.
 - Collaborated with back-end teams to integrate RESTful APIs seamlessly, conducting comprehensive testing that improved app stability by reducing bugs and ensuring smooth functionality on all platforms.
-

EDUCATION

Computer Systems Technology Diploma | Burnaby, BC

Sept 2023 – May 2025

British Columbia Institute of Technology

- Experienced with different programming languages, web development, mobile development, relational databases, technical communication, algorithms, and group projects.
- Diploma received with distinction.

PROJECTS

Quiz App | Academic Project, Web Application

Sept 2024 – Dec 2024

GitHub Link: <https://github.com/Catherine-Queenan/CS-QuizGame>

- Collaborated in a team of 5 to develop a full-stack web application aimed at enhancing mental engagement for elderly care home residents, featuring individual and group gameplay via WebSockets, multimedia quiz creation, and automated media playback for answers.
- Designed and implemented all the front-end interface and integrated WebSockets to enable real-time multiplayer quiz sessions, enhancing overall cognitive stimulation metrics within care facilities.
- Technologies used: HTML, CSS, JavaScript, Java, MySQL, and Apache Tomcat.

MediKate | Academic Project, Web Application

May 2024

Website Link: <https://medikate.onrender.com/>

GitHub Link: <https://github.com/Danton1/2800-202410-BBY34>

- Developed a medical web application offering localized climate change-related health information and an AI-powered chatbot to assist with booking doctor appointments, aiming to address climate change impacts and reduce strain on the healthcare system.
- Designed and implemented 90% of the front-end interfaces and integrated the backend database to store and manage users' medical information.
- Debugged the database integration to make sure all user information was being stored securely to ensure app reliability.
- Technologies used: HTML, CSS, Tailwind, DaisyUI, JavaScript, jQuery, Node.js, AJAX, EJS, OpenWeather's API, OpenAI's API, NodeMailer's API, MongoDB, and Cloudinary.

Recycling Game | Academic Project, Web Application

Sept 2023 – Dec 2023

Website Link: <https://bby21-e4ba0.web.app/>

GitHub Link: https://github.com/Kietkiet1109/1800_202330_BBY21

- Developed an interactive web-based game in a team of 3, designed to help and educate users on proper recycling practices by challenging them to sort different items into the correct bins.
- Organized task delegation and streamlined project workflows among a team of three, ensuring all project requirements were met while maintaining high-quality deliverables.
- Developed all front-end components and collaboratively resolved back-end errors, boosting application stability by reducing crash reports and enhancing overall user experience.
- Designed and implemented a leaderboard functionality by analyzing the user information stored in the backend database to amplify user engagement.
- Technologies used: HTML, CSS, JavaScript, Firebase, and Firestore.

EXTRACURRICULAR EXPERIENCES

Club President of Coding for All | BCIT Student Association

Jan 2024 – May 2025

- Helped plan and execute multiple successful club events, contributing to increased student engagement and participation.
- Worked through progressively higher leadership roles, starting as an executive member, becoming Vice President in the third term, and eventually earning the position of President.
- Led a team of executives, coordinating responsibilities and ensuring smooth event operations through effective communication and organization.
